

Dimitris Krinis is a Senior Reservoir Engineering Consultant with Saudi Aramco having an advisory role in reservoir management for a number of giant oil fields. He has over 30 years of experience in the oil industry in various technical roles: with Marathon Oil in the North Sea; Shell International in the South China Sea; and Aramco in the Middle East. His expertise spans field development planning, waterflood surveillance, reservoir fluid characterization, special core analysis, transient well testing, reservoir simulation, and horizontal/multilateral well completion and performance. He has worked on a number of oil and gas condensate field development projects of sandstone and carbonates reservoirs undergoing depletion drive, water injection, or gas recycling. He holds a BSc in Mining and Metallurgical Engineering (1984) from the Natl. Technical U. of Athens, Greece and a PhD in Petroleum Engineering (1990) from Heriot-Watt U., Scotland.
